1 Comment. In January 1954, (31 days), a total of about 47,600 tons of crude oil were imported to East Germany, while imports in February (28 days) totaled 32,102.4 tons. In 1954, a total of 569,000 tons of crude oil, i.e. a monthly average of 47,400 tons are scheduled to be imported. Usually about 2,500 tons of crude oil per month arrive in East Germany from both Hungary and Rumania. This indicates that crude oil shipments were about 10,000 tons below schedule in February.
